

CULTURAL COMPETENCY

Differences that make a difference

The main challenge with any diverse workforce is cultivating a genuine culture of respect among its members. In Elevate's Cultural Competency seminar, participants will learn to create this culture with an understanding of diversity, its benefits, and the subtle ways it can be disrupted that can lead to unnecessary conflicts, reduced outcomes, and diminished success. A diverse culture is an asset that can lead to a more engaged workforce and a positive outlook for employees and managers that welcomes differing perspectives.
